Security Engineer at SuccessKPI | Cloud Security | DevSecOps | AWS | CI/CD | Infrastructure as Code (Terraform, CloudFormation) | System Administrator | Threat Detection & IAM

Ahmedabad, Gujarat, India

Summary

DevOps & Security Engineer with expertise in AWS security, cloud infrastructure protection, and DevSecOps automation. I specialize in CI/CD security, zero-trust architectures, and cloud-native security solutions to enhance compliance, mitigate threats, and strengthen operational resilience.

Key Expertise:

Cloud Security & DevSecOps – Implementing secure AWS architectures, IAM policies, and automated compliance frameworks to reduce security risks.

CI/CD & Infrastructure Automation – Building Bitbucket/Jenkins pipelines, Terraform-based infrastructures, and containerized deployments for scalable and secure applications.

Threat Detection & Response – Conducting vulnerability assessments, penetration testing, and security monitoring to improve incident response and threat mitigation.

Multi-Cloud & Compliance – Experienced in AWS, GCP, and cloud security best practices, ensuring continuous compliance (SOC 2, NIST, ISO 27001, CIS Benchmarks).

Passionate about securing cloud environments, automating security workflows, and optimizing CI/CD pipelines to drive efficiency, reliability, and security in cloud operations.

Let's connect! Always open to discussing DevOps, Cloud Security, and Infrastructure Automation opportunities.
